Abstract (en)  
[origin: WO2009070104A1] This invention concerns a telephone intended for conference calls comprising various electrical control, regulatory and monitoring units, memory units, regulators for selecting functions and settings, an information screen on which menu systems coupled with functions and settings are displayed, and adjustment means that influence a cursor that can be displaced to and locked onto the desired selected heading in the menus and that activates the function or setting that is coupled to it. The telephone comprises a port that makes it possible to connect a headset to it.
