Abstract (en)
[origin: EP2216135A1] The mechanism (10) has an assembly sleeve (16) positionable at free end of a dressing shaft (14), where outer surface of the sleeve is provided with conical assembly area (22), which serves as a centering- and suspending aid during assembling a dressing roll (12) on the shaft. Maximum outer diameter (dmax) of the conical assembly area is smaller than dressing roll retention diameter (D) of the shaft or corresponds to the dressing roll retention diameter of the shaft. The assembly sleeve is fastenable at a spindle tap (20) of the dresser shaft.
