Abstract (en)

[origin: EP2216278A2] The method involves aligning a sheet (6) in the transport direction (B), and aligning the sheet in the lateral direction. The gripper carriage (8) is passed on its movement path over a sheet transfer point. The gripper carriage is stopped behind the sheet transfer point. The gripper of the gripper carriage is opened. The sheet is released for sheet transfer, and the gripper of the gripper carriage is closed for gripping the sheet. An independent claim is also included for a sheet-processing machine for treatment of sheet of paper or cardboard.
