Abstract (en)

A marine structure (1) floating in a body of water, said structure consisting of a platform (2) above the body of water and having at least three spaced upright supporting legs (3) extending downwards from the platform (2) towards the body of water, at the lower side of which a suction pile (4) is connected. According to an embodiment, the supporting leg (3) partly projects into the body of water while the suction piles (4) are completely submerged. A floater (5) extends through the space delimited by the supporting legs (3) and bears the platform (5).
