Abstract (en)

[origin: EP2216464A2] The platform has a hook (52) having an axis (60) parallel to a flat central part (54), at a level of a wing (56). The axis is oriented toward an end of the central part to cooperate with an orifice at a level of an upper surface of floors of two parallelepiped modules. The hook has a first tube (64) parallel to the central part at a level of another wing (58). The first tube is oriented toward another end of the central part to cooperate with a second hollow tube that is integrated to the floor of each module. The second tube has a section adapted to a section of the first tube.
