Abstract (en)
[origin: EP2216481A2] The device has a hanging (3) connected with a roll shaft (2) by a hanging fastening device (6) that comprises a stop section (36) and a hanging receiving section (31). The stop section is fixedly attached at an extent of the roll shaft, and the hanging receiving section is connected with the hanging. The stop section comprises a stop (34) protruding in a radial direction of the roll shaft, and the hanging receiving section comprises an attachment (35). The attachment holds and releases the stop when the roll shaft rotates in a lifting and drain directions of the hanging.
