Abstract (en)

[origin: EP2216494A2] The device has an exhibitor arm fastening unit (14) hinged at a pressure rod, and a clipper arm fastening section (16) hinged at a pressure or traction unit i.e. Bowden cable (10). The clipper arm fastening section is displaceably guided into a frame component in a direction of pressure or traction force induced by the pressure or traction unit, where the frame component is attached to a building. The exhibitor arm fastening unit is firmly fixed in the frame component during deviation and pivoting up of a pivoting section.
