Abstract (en)  
The machine has a valve (10) comprising a valve diffuser (11) that is arranged at an inside interior housing (3). A sealing element (12) is arranged between the valve diffuser and the inside interior housing, and the valve diffuser comprises a flange that is connected with an external housing (7). An intermediate ring (18) is arranged at an outside interior housing (5) and connected with the external housing, and another sealing element (20) is arranged between the intermediate ring and the outside interior housing. The two sealing elements are formed as an angle ring sealing element.

Abstract (de)  
Die Erfindung betrifft eine dreischalige Strömungsmaschine (1) mit einem Ventil (10), wobei das Ventil (10) über zwei Dichtungsanordnungen (12, 20) und mit Hilfe eines Zwischenringes (18) dichtend an die dreischalige Strömungsmaschine (1) angekoppelt wird.
