Abstract (en)
[origin: WO2009068420A1] The invention relates to a plinth lining for a household appliance, in particular for a dish-washing machine, with a plinth panel (1) and at least one plinth-panel support (3) which holds the plinth panel(1) by means of at least one latching connection, which has a front wall (23) and a base wall (19) extending below the household appliance. According to the invention, the base wall (19) of the plinth panel (1) is at least partly elastically deflectable with one section (27) to which a latching element (17) is provided for the latching connection to the plinth-panel support (3).
