Abstract (en)
[origin: WO2009059612A1] The invention relates to a blister dispenser for products like medicaments or food supplements. The blister dispenser comprises a housing with four sidewalls, a bottom, a lid with cavities for the reception of single portions of a product, whereas the openings of the cavities are oriented towards the inside of the housing when said lid is closed; and an opening in the sidewalls or the bottom of the housing for dispensing of a single portion of the product.
