Abstract (en)  
[origin: WO2009046562A2] The invention relates to a disinfection and cleaning method for eliminating mites, bedbugs, ticks, bacteria, viruses, mildew and other vermin from mattresses, bedding, spices and other objects. Said method is characterised in that the method for the deep impregnation and disinfection of mattresses, bedding, other objects and spices uses biocides, ozone and electrolytically produced oxidative radicals in water, either in combination or individually, in conjunction with the combined vacuum and pressure application technology in a vacuum and pressure container or cylinder, in order to eliminate mites, bedbugs, ticks, bacteria, viruses, mildew, fungi and other vermin from mattresses, bedding, other objects and spices.
