Abstract (en)
[origin: WO2009056433A1] The invention relates to a hand power tool having a handle, particularly an additional handle for a hand power tool, having attachment means (10) for, particularly releaseably, attaching the handle (1) to the hand power tool, wherein the attachment means (10) comprise an extension (5) that can be received in a recess (19) at least in segments, wherein either the extension (5) is disposed on the handle (1) and the recess (19) in the hand power tool, or the extension (5) is disposed in the hand power tool and the recess (19) in the handle (1). According to the invention, the attachment means (10) comprise at least one element (6) adjustable relative to the extension (5) and participating in producing and/or releasing and/or securing a form-fit and/or friction-fit connection between the handle (1) and the hand power tool.
