Abstract (en)

[origin: WO2009059599A2] The invention relates to a mounting element (10) and a tool (52, 52a, 52b) for machining the mounting element (10), wherein the mounting element (10) comprises a ribbon (12) extending in a longitudinal direction and having a width (B) and a height (H) and (L), the width (B) being larger than the height (H), and transversal embossings (14), which are configured on the ribbon (12) and are disposed transversely to the longitudinal direction (L) substantially across the width (B) of the ribbon (12), the transversal embossings (14) having variable depths (T) across the width (B) of the ribbon (12).
