Abstract (en)

[origin: WO2009053067A1] The present invention relates to an absorber element for heat and/or sound damping, comprising a flat carrier material (2), a fibrous damping material (3), and a flat cover material (4), wherein the carrier material (2) and the cover material (4) are connected to each other such that bags, which are closed on all sides, are formed, receiving the damping material (3). The present invention further relates to a method for producing corresponding absorber elements.
