Abstract (en)

[origin: WO2009071234A1] The invention relates to a method for representing a virtual keyboard on the display of a mobile terminal, as for example a cell phone, wherein the mobile terminal comprises a camera for capturing image data, a display for representing the image data and a keyboard for selecting menu functions or for inputting, for example, a text message. The invention is characterized in that the keyboard is designed as a virtual keyboard on the display of the mobile terminal and that a cursor represented on the virtual keyboard is designed to be moveable, wherein the cursor moves according to the movements of the mobile terminal in the spatial axes to the corresponding keyboard field of the virtual keyboard.
