Abstract (en)
[origin: EP2218824A1] The screed (E) has an extraction guiding structure (16) guided in a guiding sub-structure (17). A smoothing plate frame structure (14) is mounted at the extraction guiding structure, and includes an extraction screed-smoothing plate (11). Vertical guidances (20) and elevation adjustment assemblies (21) are provided between the frame structure and the extraction guiding structure, and vertically extend in relation to a linear sliding direction. The guidances and the assemblies adjust elevation of the frame structure in a parallel manner and relative to a base guiding structure (18).
