Abstract (en)  
The device has an evaporator (9), and a fluid reservoir (13) limited by a flexible foil and staying in thermal contact with the evaporator. The foil limits a storage area for a bottle (8). The storage area is located below the fluid reservoir. The evaporator is immersed in the fluid reservoir. The evaporator forms an upper side of the fluid reservoir. A close thermal contact is formed by a heat transfer circuit serving as a thermo siphon. The transfer circuit has a heat exchanger staying in contact with the evaporator. Another heat exchanger stays in contact with the fluid reservoir.

Abstract (de)  
Bei einem Kältegerät mit wenigstens einem Verdampfer (9) und einem in engem thermischem Kontakt mit dem Verdampfer (9) stehenden Flüssigkeitsreservoir (13) begrenzt eine flexible Folie einerseits das Flüssigkeitsreservoir und andererseits einen Lagerplatz für eine Flasche (8).
