Abstract (en)

[origin: WO2009080995A2] The invention relates to a method of displaying a representation (22) of a user (12) in a virtual environment (20) in which a plurality of user representations evolves. According to the invention, such a method comprises the following steps, for a given user: determination of a destination zone in the virtual environment in which the representation of the user is to be rendered; determination of an appearance zone in the virtual environment; displaying of the representation in the appearance zone; and automatic movement of the representation from the appearance zone to the destination zone.
