Abstract (en)
[origin: WO2009065698A2] In a suction device (100) for motor vehicles (9) with a suction hose (1) whose one end (2) communicates with a suction device (3) and whose other end (7) forms a suction opening (8) for suctioning of the exhaust ejected from the exhaust system of a motor vehicle (9), the suction opening (8) comprises an extension (13); the suction hose (1) is provided with a stabilizing device (16) which holds the suction hose (1) in one resting position or in one suction position in which the extension (13) rests against the motor vehicle (9), and the stabilization device (16) is designed so as to press the extension (13) against the vehicle (9) into the suction position.
