Abstract (en)

[origin: WO2009057068A1] A shaving blade unit (10) comprising a shaving cartridge (15) having a floatably secured shaving blade member (20) wherein said cartridge comprises: a) a housing (25) with a front wall (26), a rear wall (27), and opposing side walls (28) extending between said front and rear walls; b) said shaving blade member having opposing ends (21) with a shoulder (22) at each end and wherein said shoulder rests along said side wall and wherein a cutting edge (23) of said shaving blade member is facing a front surface (25a) of said housing; c) a resilient member (30) disposed rearward of said shaving blade member and that is secured by a shaving blade member retainer (35); and wherein said resilient member provides a forward biasing force to said shaving blade member such that said contact between said shoulder and said side wall is at least maintained when said unit is removed from a skin surface during shaving.
