Abstract (en)

[origin: WO2010046037A2] The invention relates to a method and a device for producing a packaged unit. Individual products (3) are combined into a product cluster (2) and are fixed relative to each other by means of a shrink film (1). For this purpose, the shrink film (1) is wrapped around the product cluster (2) such that at least one lateral opening (5) is formed, and the shrink film (1) is then shrunk. According to the invention, the shrink film (1) is placed against the product cluster (2) at least in the region of the lateral opening (5) such that a closed surface is formed in the shape of a closure (6) that has optionally overlapping folded zones (8a, 8b).
