Abstract (en)

[origin: WO2009077194A1] The present invention relates to an industrial truck having an RFID-supported device for identifying cargo goods. The industrial truck (10) comprises an RFID transceiver for detecting and reading memory content of mobile data memories of loads and at least one RFID antenna (26), which is associated with a load bearing means (18) of the industrial truck (10). The RFID antenna (26) is arranged within the outline of the load bearing means (18) and is physically integrated therein.
