Abstract (en)
[origin: WO2009074403A1] The invention relates to two- or multi-phase detergents or cleaning agents which comprise a) a bleaching agent, b) a bleach activator, c) a bleach catalyst, selected from the group of bleach boosting transition metal salts and transition metal complexes, the bleaching agent a) being present in a separate phase of the detergents or cleaning agents separate from components b) and c). The detergents or cleaning agents according to the invention are characterized in that the bleach activator b) is used in particulate form and the bleach activator particles comprise, based on their total weight, a percentage in bleach activator of more than 80% by weight. The detergents or cleaning agents according to the invention have a good cleaning power on bleachable soilings.
