Abstract (en)

[origin: FR2923502A1] The wash basin and/or sink has a cover for permitting access to an extra-plate drain (12) such as QUICK DRAIN(RTM: low profile linear shower drain). The drain is integrated in a volume of the wash basin and/or sink to obtain a trap seal during fabrication, where the wash basin and/or sink is made of ceramic, plastic, composite or metallic material. The cover completely closes a drain channel (1) for saving a water reserve in the wash basin and/or sink. Slits reduces and limits a stored quantity of wastewater.
