Abstract (en)  
[origin: CN101889183A] The invention relates to a refrigerating appliance, especially a household refrigerating appliance, comprising at least one door tray (5) arranged on the inner wall (73) of the door (1) of the refrigerating appliance in a height-adjustable manner. At least one wall (6) of the door tray (5) comprises at least one spring element (7) as a component for adjusting the height of the tray, that can be elastically inclined transversally, especially perpendicularly, in relation to the plane of the wall (6).
