Abstract (en)
[origin: WO2009062788A1] The invention relates to a document comprising an integrated display device (102), a memory (126) for storing data (106), and means (104) for triggering the display device to represent the data. The display device has several display elements (103) which are arranged in a distributed manner within the space of the display device. The triggering means are designed such that the display elements are triggered in an order that deviates from the arrangement of the display elements in space during an image repetition period for representing the data.
