Abstract (en)

[origin: WO2009074856A1] A maneuvering device with accumulation of electric energy for switches or - disconnect switches (S) boxed and modular, comprising a small -sized low- current power supply device (AL), which is used only for charging an accumulation capacity (C), which acts as an electric energy collector; the electric energy accumulated is supplied to a motor (M) in direct current during the opening, closing or refunctioning maneuvers of switches or disconnect switches (S).
