Abstract (en)  
[origin: EP2220953A2] The device has two identical and parallel narrow U-shaped parts respectively comprising rear branches (1, 1') whose upper ends are connected by a horizontal section (4), where the bar is formed of single filiform piece. The U-shaped parts respectively have front branches (2, 2') that are extended by totally folding rearward and downward and by separating from parallel planes formed by the U-shaped parts. The rear branches are slightly longer than the front branches. The filiform piece is made of metal, alloys or plastic material.
