Abstract (en)

[origin: EP2221436A2] The key (1) has a shaft (3) comprising a key back (4) and a key front (5). Closing recesses (6, 6') are arranged in the key front for supporting pin elements (7) of a closing cylinder (2). The closing recesses are laterally defined by flanks that are divided into different sections. The flanks comprise different slope angles perpendicular to a longitudinal axis of the shaft. The recesses are designed asymmetrically, where incision bases of the recesses are arranged parallel to the longitudinal axis of the shaft.
