Abstract (en)
[origin: FR2920645A1] The footwear has a rigid plastic maintenance piece (1) e.g. plate, comprising an upper part (11) covered by a decorative object and arranged on top of a foot (2). The piece has a central part (12) connecting the upper part to a sole (3), and a lower part (13) fixed in the sole. The piece has sufficient rigidity so as to maintain the sole under the foot using a single fixation point at the sole, when the foot is raised. The central part passes between two toes, and the piece is adopted for different thicknesses of feet by elastic deformation. The sole has an edge part (31) that forms a stop.
