Abstract (en)
[origin: WO2009080403A1] A front-adjustment means for drawers comprises a slide (4) which can be secured on a side frame (3) and is mounted in a displaceable manner on a guide (5) which can be connected to a front panel (2), wherein the guide (5) and slide (4) have arranged between them a rotatable worm wheel (6) which moves along the guide (5) as the slide (4) rotates. This makes it possible to have an easy-to-install adjustment means having only a small number of components.
