Abstract (en)  
[origin: CA2706449A1] The invention relates to a method for controlling or regulating the temperature of a cast strand (2) in a continuous casting plant (1) comprising a control or regulating unit (3) particularly for controlling or regulating the temperature in a secondary cooling of a continuous casting plant, using at least one agent for cooling the cast strand, characterized by a dynamic change of at least one target temperature of the cast strand on the basis of data and/or signals that are received and/or determined by the control or regulating unit.
