Abstract (en)  
[origin: WO2009077560A1] The invention relates to a candleholder (20) for receiving disk-shaped candles, in particular tea candles, having a receiving body (21) and an envelope body (22), which is implemented independently of the receiving body, and which is implemented as an annular sleeve having a substantially L-shaped or U-shaped cross-section, having an envelope shell (40), which covers a peripheral surface (39) of the receiving body, an annular envelope disc, which covers the top side of the receiving body, and an envelope border, which borders an inner margin of a receiving opening of the receiving body, wherein the bottom side of said receiving body is provided with a centering projection, which protrudes from an annular stacking base of said receiving body, and the outer centering diameter thereof corresponding to an inner centering diameter of said envelope border, and wherein said envelope disc of said envelope body has a cross-sectional profile which corresponds to a cross-sectional profile of said stacking base.
