Abstract (en)

[origin: WO2009074202A1] The invention relates to a plug-in piece (11) for a fluid line coupling, provided with radial projections (15) and recess sections (16) between the radial projections (15) lying radially inwards of and/or axially behind the radial projections (15). On starting an insertion process there is thus a relatively small contact region with a seal unit (5, 6, 7) provided in a housing piece (1) with a correspondingly relatively small insertion force.
