Abstract (en)
[origin: GB2454947A] A receptacle of moulded paper pulp has a flat circular base wall 112 and a side wall 114 of an inverted frusto-conical shape extending upwardly from the base wall to define a receiving volume. The upper edge of the side wall defines the periphery of an opening located above the base wall and has an outwardly projecting peripheral lip 122, 124 having at least two recessed portions 126, 128 wherein, the width of the lip, between the recessed portions 126, 128, is non-constant. The two recessed portions 126, 128 form first and second spaced-apart outwardly projecting lip portions 122, 124 which form convenient handles for the receptacle. In addition, the side wall is provided with a stiffening or reinforcing shoulder 18 adjacent to its upper edge.
