Abstract (en)

[origin: EP2223639A2] The rail (1) has a U-shaped profile (2) comprising side brackets (3, 4) i.e. spring-clamping brackets, for detachably fastening to an object, and surface zip fastener elements (6) that are provided at an outer side. Counter elements work together with the surface zip fastener elements. One of the side brackets comprises a longitudinally running display (7) inwardly formed at a free edge region, where the display and the fastener elements are locked or inserted into retainers. Other side bracket is fixed to a counter bearing of the retainers and exhibits an overlap or mirror-image form. The U-profile is made of plastic or aluminum.
