Abstract (en)
The invention relates to a method and system of operating a multi-station printing press in which the material to which the printing is applied is fed through the press in a first direction. The method and system comprises providing a feeding unit (1) on which means (4,2) are provided for feeding a web to a station of the printing press in a direction at right angles to said first direction, turning the web through 90° and feeding it directly to the printing head at that station, turning the printed web through 90°, and rewinding the printed web.
