Abstract (en)

The post (2) has profiles made of an extruded aluminum, and a mounting part for mounting a glazing (3). A longitudinal rigidification element is located at the back of the mounting part relative to an external face of the post and constituted by a profiled portion (9) oriented along a longitudinal direction of the post, where the profiled portion includes a rectangular transversal section. A translation stop portion (8) is constituted by a recess projected on an external surface of the profiled portion.

Abstract (fr)

La présente invention concerne un montant de vantail coulissant comportant une partie de montage d'un vitrage caractérisé par le fait qu'il comporte un élément de rigidification longitudinale situé à l'arrière de la partie de montage relativement à la face externe du montant. La présente invention s'appliquera à des ouvertures à ouvrants coulissants.
