Abstract (en)

[origin: EP1965084A1] Fluid-technical appliance (9a) comprises communicating units (45, 58, 61, 65, 67) for wireless communication with upper and lower components (20, 22) of an automated system (10) and/or a neighboring component of the automated system. Preferred Features: The communicating units form a component of a control module (26a, 26b) for controlling the appliance. The communicating units are modular.
