Abstract (en)

[origin: CN101814670A] The invention pertains to a cable-arraying insert for a connector for a simple option for connecting electric conductors (7) of an electric cable (6) to a connector (1) and, in particular, to always ensured the correct length of the conductors with electric contacts (28) attached thereto, the invention proposes a so-called cable manager (10) with a measuring pin (12), on which the individual electric conductors (7) can be measured and correspondingly capped such that the desired and exact length of the electric conductors (7) to be inserted into the connector is always ensured after the attachment of the corresponding electric contacts (28).
