Abstract (en)

[origin: WO2009080224A1] The present invention relates to a guiding device for submersible motor agitators comprising a guiding tube and a sliding carriage for receiving the submersible motor agitator. The guiding tube is held in at least one lower fastening and one upper fastening and can be adjusted via an adjustment lug. According to the invention, the sliding carriage and the adjustment lug are dimensioned in such a way that the sliding carriage carrying the submersible motor agitator can be pulled off the guiding device without the need for disassembling the guiding device.
