Abstract (en)
[origin: WO2009053525A1] The invention relates to a lifting transportation device, the purpose of which is particularly handling of load advantageously by load platforms {I}, such as RoRo, terminal, industrial cassettes and/or the like, and, which comprises a pulling device (2), equipped with an essentially built-in lifting transportation rear part (2a) or that is to be coupled with a separate lifting transportation carriage (2a), and power transmission means for power transmission for driving and for power transmission for lifting of the lifting transportation rear part or carriage. The lifting transportation device is equipped with a cabin (2b) in order to enable its manual steering, which cabin is arranged moveable essentially in a crosswise direction (p) of the lifting transportation device in order to improve operator ' s visibility.
