Abstract (en)
[origin: US2009162491A1] A brewing sachet (1) for brewing tea or tea-like substances, has a fluid-permeable envelope (3) which contains the tea or the tea-like substances, and with a holding element (2) arranged on the envelope (3). In order for the brewing sachet (1) to also be suitable for take-away drinks or likewise, without a special external device being required for this, it is suggested to fasten a pull device (4) on the envelope (3). Furthermore, it is suggested for the holding element (2) to extend roughly to the lower edge of the envelope (3), in order to be able to press out the envelope (3).
