Abstract (en)

[origin: WO2009083414A1] The invention relates to a refrigerator having a trough, in which compartment areas have been positioned to provide compartments. A property of the refrigerator is that, on the basis of the existing connection points, a support plate (2.1) is disposed on the compartment area (1) from below and a movable egg drawer (2) is fastened inside the attached support plate, which contains numerous egg slots (2.2.1) and an egg compartment (2.2), in which egg cartons (3) can be positioned and stored directly.
