Abstract (en)
[origin: WO2009073997A1] Disclosed is a holding device (1) for a poster-shaped information support, comprising two board segments (2) for receiving the information support therebetween, at least one of the board segments (2) being transparent in order for the information support to be visible. A base (3) is used for inserting the two board segments (2). A means (4) is provided for leaving a gap between the two board segments (2) for receiving the information support. Said means (4) for leaving the gap (20) between the two board segments (2) is a web which is arranged within the base (3) and extends between the board segments (2), and/or a spacing element (4) that lies between the board segments (2).
