Abstract (en)

[origin: EP2225986A2] The arrangement has a profiled rail (1) comprising profile parts (12, 16, 18, 20), which engages in a recess (14) of another profiled rail (2), where separative elements i.e. plates (7, 8), are connected together in a region of side edges (5, 6) arranged to each other by the profiled rails. The side edges of the separative elements are connected with one of the profiled rails by adhesive joints (10). The profiled rails comprise complementary bars and/or the profile parts such that the connection of the profiled rails is executed during assembling of a partition i.e. shower partition.
