Abstract (en)

[origin: EP2226258A1] The package (1) has a container containing a food product and comprising a reservoir (3) closed by a lid, where the container is made of plastic material. A sleeve (5) surrounds the container, and is contacted with the container. The lid is coated with an identification label (6) that identifies the food product contained in the container. The identification label is plated by removing a zone having predetermined geometry, of the sleeve and forming the identification label. An independent claim is also included for a method for fabricating a package.
