Abstract (en)

[origin: EP2226268A1] The method involves inserting bulk goods in a frame (1) made of antistatic plastic, where the frame has an upper side (3) that runs parallel to a flat base (2). A cover made of antistatic plastic is fitted on the bulk goods. The frame is inserted into a bag (6) made of antistatic plastic foil. The bag is evacuated and closed in an air tight manner. The bag is made of volatile corrosion inhibitors e.g. aluminum composite foils. The cover is arranged within side walls (4) of the frame. The frame is adapted to small load carrier, which exhibits a dimension according to VDAstandard. An independent claim is also included for a package unit, which comprises a frame.
