Abstract (en)  
[origin: EP2226432A2] The terminal block comprises two inlet connections for conduits, where an outlet connection is provided for lead away conduits. A plug connection unit is provided for producing a plug connection between a connector block and the sanitary fittings (1). A flushing line is formed as a channel in the connector block, where the inlet connections are connected with the outlet connections. The direction of the plug connection runs parallel to the surface area of a wall.
