Abstract (en)

A flushing tank operating plate/counterplate assembly (1) is formed by a counterplate (6) connectable to a support wall (19), a substantially flat plate (7), and a fastening device (8) for fastening the plate to the counterplate; the fastening device (8) consists of a pair of male elements (40), parallel and orthogonal to the plate (7), that engage a seat (41) formed in respective elastic female elements (42); the male elements (40) are insertable into the seats (41) along an insertion direction orthogonal to the plate (7), and the female elements (42) are elastically deformable in a substantially crosswise direction with respect to the insertion direction.
